ANNOUNCING THE TEMPORARY CLOSURE OF THE HOLLYWOOD FACILITY FOR SCANNER AND FACILITY UPDATE

During this time of uncertainty in our world, there is one sure thing you can depend on and that is PET Imaging Institute of South Florida working hard to bring you the very best PET scan experience. As we navigate our way together through this "new-normal," we have decided that now is the optimal time to replace the scanner at the Hollywood facility with the latest GE Discovery IQ 4-Ring Scanner already in place at the Fort Lauderdale and Pembroke Pines facilities. As patients decide to postpone scheduling their PET scans due to health and safety concerns related to the COVID-19 pandemic, we also know that a time will come, in the near future, where a semblance of normalcy will return and we will need to be ready to schedule patients with urgency. By taking the steps to install the new scanner and remodel the Hollywood facility now, all three locations will be ready to serve patients in a quick and efficient manner with expert timely reports to help physicians guide treatment. By bringing in this new scanner, it ensures all of our locations are working synergistically and are equipped with the latest in PET scanning technology.

While the Hollywood office is temporarily closed, patients will be scheduled at either Fort Lauderdale or Pembroke Pines locations. As always, we will continue to provide free transportation and the fastest turnaround time on reports. When you are ready for your appointment, we will be ready to serve you.

GE DISCOVERY IQ 4-RING SCANNER INFORMATION

The GE Discovery IQ 4-Ring scanner's technology offers up to 2x's improvement in image quality and quantitation accuracy providing optimal conditions for detectability of smaller lesions, lower doses, reduced scan times and enables the best possible outcomes for more people in more places. What this means is: we offer the fastest scan times (10-12 minutes), safest (lowest dose) and most accurate PET scan experience in the region.
